PROFESSIONAL SUMMARY

- Senior Java Full Stack Developer with 8+ years of hands-on experience in the full software development life cycle (SDLC) — from requirements analysis and architecture design to deployment, testing, and production support. Specialized in building scalable, high-availability microservices and enterprise web applications using Java (8/17/21), Spring Boot, and React/TypeScript.
- Proven expertise in cloud-native development across AWS (EC2, S3, Lambda, SQS, API Gateway, CloudWatch) and GCP (BigQuery, Looker), with deep proficiency in containerization using Docker and Kubernetes, CI/CD pipelines via Jenkins, and event-driven architectures using Kafka and RabbitMQ.
- Experienced in Reactive Programming (Mono/Flux), RESTful API design, Spring Security, Hibernate/JPA, and both relational (PostgreSQL, SQL Server) and NoSQL (MongoDB, Redis) databases. Skilled in building SPAs with React 18, Redux, and Angular, with a focus on performance-optimized, mobile-friendly, and accessible user interfaces.
- Track record of delivering measurable results: 25–30% API performance improvement at Verizon, 15% system performance gain at FAB, 20% infrastructure cost reduction via Docker/CI-CD adoption, and 80%+ test coverage maintained across all projects. Experienced Agile practitioner (Scrum, TDD, Sprint Planning, JIRA) who has led cross-functional teams and mentored junior developers.
- Available immediately. Based in Irving, TX — open to remote, hybrid, or on-site roles nationwide.

KEY ACHIEVEMENTS

30% API response time improvement at Verizon via Spring Boot optimization	15% System performance gain at FAB using Java Reactive Programming
20% Infrastructure cost reduction via Docker & CI/CD pipeline migration	80%+ Unit test coverage maintained using JUnit, Mockito & SonarQube
8% Upload time reduced with parallel S3 asset processing via AWS SDK	5 Devs Led cross-functional team to deliver banking microservices on schedule

TECHNICAL SKILLS

Languages	Java 8/17/21, Python, SQL, TypeScript, JavaScript
Frameworks	Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, React 18, Redux, Angular
Cloud & DevOps	AWS (EC2, S3, Lambda, SQS, API Gateway, CloudWatch), GCP (BigQuery, Looker), Docker, Kubernetes, Jenkins
Data & Messaging	Kafka, RabbitMQ, PostgreSQL, MongoDB, SQL Server, Redis, Airflow
Architecture	Microservices, RESTful APIs, Serverless, SOA, Reactive Programming (Mono/Flux)
Testing & Tools	JUnit, Mockito, Swagger/OpenAPI, SonarQube, JIRA, Git/GitHub, Maven, Gradle
AI Dev Tools	GitHub Copilot, Cursor AI, Gemini AI

PROFESSIONAL EXPERIENCE

Verizon | **Senior Java Full Stack Developer** | Aug 2022 – Jan 2026

- Engineered 15+ high-performance REST APIs using Spring Boot, achieving 25–30% improvement in system response times across enterprise workflows.
- Built reusable React 18 components with TypeScript and Redux for state management, enhancing UI maintainability, performance, and user engagement.

- Designed a secure Data-as-a-Service (DaaS) gateway with rate-limit-based authentication to control enterprise data access across internal services.
- Implemented dynamic JSON-driven approval workflow engine, enabling business teams to reconfigure approval flows without any code deployments.
- Developed Python/Airflow DAG pipeline to migrate data from PostgreSQL to GCP BigQuery weekly, powering Looker BI dashboards for bi-monthly executive reviews.
- Integrated GCP BigQuery and PostgreSQL backends with complex query optimization for high-volume, low-latency data retrieval.
- Applied global exception handling, API versioning, Spring Security RBAC, and Swagger/OpenAPI docs for production-grade robustness.
- Achieved 80%+ unit test coverage using JUnit, Mockito, and SonarQube; championed TDD practices across all sprint deliverables.
- Collaborated across Agile Scrum teams — daily standups, sprint planning, retrospectives — using JIRA for tracking and GitHub/GitLab for code reviews.

Tech Stack: Java 17, Spring Boot, React 18, TypeScript, Redux, PostgreSQL, GCP BigQuery, Airflow, Kafka, Docker, Kubernetes, Jenkins, Redis, JUnit, Mockito, Swagger

Cognizant / First Abu Dhabi Bank (FAB) | Java Backend Developer | Feb 2021 – Aug 2022

- Developed reactive microservices using Java async programming (Mono/Flux) that boosted system performance lighthouse score by 15%.
- Led a team of 5 developers to design and deliver critical customer onboarding microservices for a mobile banking app under aggressive Agile timelines.
- Drove migration to Docker-based CI/CD deployments, reducing total infrastructure and operations overhead by 20%.
- Built serverless backend components using AWS Lambda and API Gateway; migrated legacy FTP submission flows to a secure AWS SFTP/S3/SQS pipeline.
- Designed AWS S3 upload workflow via JavaScript AWS SDK enabling parallel asset processing, reducing upload time by 8%.
- Enhanced application security by storing sensitive environment variables and config properties in AWS S3 with IAM-restricted access policies.
- Containerized all microservices on Kubernetes clusters on AWS; established team-wide code standards, review checklists, and onboarding documentation.

Tech Stack: Java 21, Spring Boot, AWS (EC2, Lambda, S3, SQS, API Gateway, CloudWatch), Docker, Kubernetes, PostgreSQL, Redis, CI/CD, Mono/Flux, JIRA

Relavantz Technology / Ciox Healthcare | Java Developer | Jul 2017 – Feb 2021

- Modernized legacy monolithic architecture by migrating applications to AWS cloud using Spring Boot microservices and RESTful API patterns.
- Developed core RESTful APIs with Spring Boot, Spring Security, and Hibernate to support high-traffic enterprise healthcare workflows.
- Leveraged Java 8 features (Lambda Expressions, Parallel Streams, Functional Interfaces) and concurrency patterns to optimize backend throughput.
- Built interactive frontend reporting charts and data tables using Angular, ensuring seamless integration with Spring Boot APIs.
- Implemented SOA design patterns (Singleton, MVC, Business Delegate) and contributed to team code reviews and best practices documentation.

Tech Stack: Java 8, Spring Boot, Spring MVC, Spring Security, Hibernate, Angular, RESTful, Kafka, MongoDB, Oracle, Maven, Kubernetes, Jenkins, GitHub

EDUCATION

Bachelor of Engineering in Computer Science | Anna University, India

WORK AUTHORIZATION

H1B Holder. Currently based in Irving, TX. Open to remote, hybrid, or on-site roles nationwide.
